[Overview]

[[About Me]]

I'm Kit, a game designer that specialises in UI/UX

The interface is the voice of the developer and if it is not clear then it is not heard, so I create this clarity with iterations based on the feedback of others as my perspective is not all seeing and not without its blind spots.

Besides designing games; I'm an avid tabletop fan whether that's wargaming or role playing games, I also partake in a few outdoor hobbies such as hiking to try and mitigate all of the time my face is pressed against a screen.

[[Education]]

Computer Games Design
Master's degree – University of Staffordshire

Computer Gameplay Design and Production
Bachelor's degree – University of Staffordshire

Google UX Design
Certification – Google/Coursera

[[Technical Skills]]

- Figma
- Useberry
- Adobe Cloud
- Sketch
- Unreal Engine
- Unity
- Godot
- Miro
- Jira
- Html/CSS

[Employment]

[[UI/UX Designer Intern]] ▶ "University of Staffordshire" "08/2026 - 10/2026"

- Developed both Wireframes and Mockups using Figma, based on the team's design brief.
- Handled multidisciplinary meetings relating to UI development.
- Used UMG to implement the UI designs into engine, as well as to create animations and functionality for the widgets.
- Created User Testing Documentation that would be used to survey Players then analyse the data into actionable feedback

[[Student Demonstrator]] ▶ "University of Staffordshire" "03/2025 - 05/2025"

- Supported the lecturing staff during the User Interface Design and Implementation module.
- Assisted students with module content and debugging blueprint errors.

[Project Experience]

[[Bouncy Guyz]]

Role: UI/UX and Accessibility Designer / Team Size: 3 / Duration: 4 Days / Year: 2026

- Handled both in and out of engine development of the user interface. Including Wireframes, UI art assets, Implementation and Functionality.
- Ensured that all gameplay elements were accessible by using WCAG, Accessible Games Initiative and other resources as reference.
- Conducted user testing after initial development, to create a user research slide deck which was used to iterated upon the project.

[[Potion Commotion]]

Role: Lead UI/UX Designer / Team Size: 30 / Duration: 4.5 Weeks / Year: 2025

- Designed and produced iterated versions of user interface elements; such as the HUD, minigame UI and menus.
- Handled administration duties; such as planning, attending project meetings and documentation.
- Managed artists and programmers for UI asset creation and implementation.
